

## MEET THE NEW OLYMPION DIALYSIS CENTER IN AMALIADA

The New OLYMPION Dialysis Center in Amaliada, in state-of-the-art newly built facilities, is easily accessible from all the hotels along the beautiful beaches in the surrounding area and welcomes Greek and international patients.

Built in a space of 9,000 m<sup>2</sup>, in a location that exudes tranquility in the natural beauty of the Municipality of Iliada, it offers spacious, free parking and is easy access by public transport.

The ultra-modern and luxurious OLYMPION Dialysis Center, with unparalleled aesthetics, outside as well as inside the building, offers state-of-the-art technology and latest generation equipment, combined with the implementation of strict hygiene measures, guarantees the best possible quality in people's lives that require dialysis.

The sun-lit dialysis hall is spacious, architecturally elegant and ergonomically designed to serve all the patients as well as patients with mobility problems. Comfortable changing rooms and waiting halls are also available within the luxurious air-conditioned facility.

***The balance between aesthetics and functionality of all the departments for the convenience of patients, is harmonious and pervasive.***

The New Model OLYMPION Dialysis Center in Amaliada was created by people with knowledge and sensitivity, with the sole purpose of offering kidney patients, the opportunity to enjoy carefree and quality holidays at a destination rich in history and natural beauty.

It combines high technology, provided by the companies Baxter and Gambro, specialized in high standard technical support for renal treatment, and experienced staff. The experienced and well-trained medical and nursing staff are constantly taking care of the safety and comfort of the patients during their treatment. The medical team is overseen by the Scientific Director, who ensures that treatment is provided according to the highest medical standards.

At the OLYMPION Dialysis Center in Amaliada, the staff is aware of the importance of truly empowering patients and this is what ensures a holistic kidney care experience.

At the OLYMPION Dialysis Center in Amaliada, the aim is excellent patient care, through the continuous effort to improve clinical practice. With investments in technology and special training, and encouragement in creativity and team spirit, the medical and nursing staff are constantly trying to find better ways to meet the needs of the patients.

Dignified and personalized care is provided to the patients, with respect to their needs, views, beliefs, background, age and gender. Through a special collaboration of the staff and the patients, the patient is educated and encouraged to take an active role in his treatment. This ensures that the patient receives the best dialysis care possible.

The OLYMPION Dialysis Center in Amaliada offers a secluded, especially designed hall with specific dialysis machines for patients with hepatitis and other contagious conditions.

For the protection of the staff and the other patients, the dialysis sessions are always carried out according to the Quality Management System of the International Standard ISO 9001:2015.

The excellent patient care combined with the consistently high treatment standards, deliver superior medical outcomes, based on a highly standardized system of clinical management and practice.
